THE REDCLIFF REVIEW, THURSDAY, MAY 16th 1929.

Number 11

Council Co-operates With Local Clubs

Final Accommodation for Football Clubs and Girls' Baseball

There was a full attendance at the council meeting last Monday evening. After the reading and adoption of the minutes a letter was read from the Medicine Hat hospital drawing attention to the condition of C. Conroy who has been in the hospital for the past three years, and stating he is now finished with treatment and is classed as an incurable. As such, it was pointed out, he is now a charge upon the town and the hospital asked for instructions. On motion of councilors Simpson and Campbell, the secretary was instructed to forward a copy of the letter to the Utilities Commission asking for advice as to what to do.

The auditors submitted a statement for the past four months showing that finances were in satisfactory condition. The usual accounts were approved for payment.

Monday, May 27th, was the date set for the Council to sit at a Court of Revision, the same to be held in the Council Chamber at 8 o'clock p.m.

A price of \$300 was placed on the brick house on Broadway just west of the spur track. The offer of \$75 for a shack on First street was accepted. The offer of \$100 for the piece of property around the old shoe factory, for range purposes, was accepted.

Messrs. J. Stratton and A. J. Learmonth appeared before council representing the football clubs and asked if the council would loan a shack of board as a dressing room for the hall grounds. On motion of councilors Dixon and Campbell Mr. Kitchen was instructed to secure a suitable building.

On behalf of the Girls' Baseball club L. L. Stone asked council for permission for the girls to use the old Redcliff building as training quarters. Council thought the building mentioned was not suitable and suggested the new building on Broadway. On motion of councilors Simpson and Campbell the girls were allowed the use of the latter building on condition that their trainer, Mr. Lowmes, be responsible for same.

It was decided that the hours for watering gardens this year be from 8 a.m. to 8 p.m. and that only sprinklers may be used. Any disregarding these rules will be prosecuted. The price for lots was placed at the same as last year, \$2 for the first lot and \$1 for each additional lot.

Officials of the C. P. R. asked permission to purchase from the town some land north of the station for the purpose of putting in a Y. After consideration it was decided to sell the land required at a price of \$50 an acre.

FATAL AUTO ACCIDENT NEAR MEDICINE HAT LAST FRIDAY

Returning from Redcliff on Medicine Hat last Friday night, a car driven by Fred Morrison, of Medicine Hat, turned over and ran into the side of the occupants, was killed.

When turning the corner into the city the wind swept the car off the road and the car turned over. Besides the driver and Thompson there were four other men in the car. The others all escaped with minor bruises. Thompson was rushed to the hospital by car following. When he arrived there it was found he was dead. His neck was broken by the fall.

At the inquest on Saturday the coroner's jury found in an open verdict. After the inquest Mr. Morrison, the owner of the car, was charged with manslaughter and allowed out on a \$4000 bail.

Deanery Conference Held at Redcliff

Was Held at St. Ambrose—arrived at Redcliff Last Tuesday

(Contributed)

Every third year St. Ambrose, W. A. have the privilege of having the annual Deanery convention in the parish hall. This being the case on Tuesday, May 14th, when Rev. Canon Heston and Mrs. West, Rev. and Mrs. Dixon, Mr. Bilbrough from Swift Current, Threlkorth, Piceasee, Mrs. Parns, with Deanery Secs. in all about 20 delegates and members, met in St. Ambrose church at 11 o'clock services. Rev. Cooper preached on the text 1 Gal. chap. 6, verse 2. "Let us not weary in well doing, for in due season we shall reap if we faint not," reminding us in his usual able manner of our privilege and its reward. Holy Communion followed. Rev. Canon Western delivered, assisted by Rev. Cooper and Rev. Dixon. After services lunch was served in the parish hall. Afternoon session was opened with prayer by Rev. Canon Western. Mrs. Conn was very hearty welcome to all visitors and Mrs. Allison Smith replied with compliments.

Then Deanery and parsonal reports were read by officers. Mrs. Bilbrough gave an address on "The W. A. work" which was what the fraternal part consisted of. She also spoke on thanksgiving, encouraging each one to take a collection box home and give practical thanksgiving for all blessings we enjoy. Mrs. Cooper read a most interesting paper on "The W. A. stands for" in which she said that the fraternal part could be heard and seen and over with benefit to every one who heard it. It brought to W. A. members the practical character of Bible teaching in a wonderful manner.

Evening service was held in the church. By Rev. Dixon after which afternoon tea was served. One of the most enjoyable Deanery Conference closed by Redcliff members going to the eight o'clock train to see the visitors off.

LADIES EXTEND WELCOME TO BRIDE FROM ENGLAND

(Contributed)

On Wednesday, May 15, a number of ladies met at Mrs. P. Conn's home, a second sister, in host of and welcome Mrs. Leonard Shinnon a recent arrival from England. When all the ladies had assembled and each one had brought along a parcel, a perfect shower of good news and good wishes was presented to the bride by Miss Norma White. To say that the bride was surprised is an understatement, but she thanked all the ladies very heartily and said she had been told to shower in England but had not been told that which she had just received. She appreciated the kind thoughts of all so much she was already in love with the car and present and was sure, after receiving such a welcome from a happy, she was going to have a very happy time in Redcliff. Mrs. Conn informed the bride that when they knew what had arrived in Redcliff they were all so anxious to welcome her from England that they had to arrange this little affair to meet her sooner than they might have otherwise done. As most of them hailed from England it was just good to meet one another. To say that there was then passed around with such dainty care and a pleasant rest hour was spent.

J. E. Tarrant left last Tuesday for Canmore to attend the meeting of the Local Provincial Council held there this week. Mr. Tarrant represents the Redcliff branch.

New Legion Quarters Are Officially Opened

Redcliff Legion Club Rooms were those who gave their lives for their country. On behalf of the Medicine Hat branch Mr. McQueen presented the new quarters with a library table and several large pictures.

President J. E. Tarrant thanked the hat branch for their splendid gifts and also commended for his inspiring address. He also referred to the many occasions in the past in which the president, secretary and other officials of the sister branch had come to the assistance of the local branch, and he assured them that these were all greatly appreciated. He expressed the hope that comrade McQueen would be the next president of the provincial council.

After congratulating the local club on their excellent quarters and referring to the excellent work done by the committee in charge of renovating the building, E. L. Stone reminded the members that beautiful quarters was not all that was necessary to make the club a success. Starting out under such favorable circumstances much still depended on the members themselves whether or not the club would be the success it should be. He expressed the hope that all would co-operate with the officers to make this not only the best quarters but also the best conducted club in the province.

R. E. Hodge, who acts as chairman, expressed the appreciation of the local club for the consideration extended to the Legion by the town. He said that when the returned men first organized there were those who said it would not last a year. He was glad to see that despite fire and cold water, the local Legion was still in its humble way, trying to carry out the principles as outlined by comrade McQueen. Mr. Hodge tendered the thanks of the Legion to all who helped bring the building to its present satisfactory condition, the one assisted in the opening ceremony and Mrs. Broadfoot, who kindly loaned her piano for the occasion.

Throughout the evening there was

Grand Lodge Officials Visit Local Lodge

President of Redcliff Assembly Here For Last Year's Meeting

(Contributed)

At the meeting of Vega Redcliff Lodge No. 79 last Wednesday the Lodge was very pleased to welcome Sister Charlotte Martin, President of the Redcliff Assembly of Alberta, who was paying her official visit to Vega Lodge. Sister Ferguson, P. N. G. of Faith Lodge, Lechbridge, accompanied the President. Other visitors present were Mrs. and Sister Cope and Sister Maxwell. Most Grand Lodge officials, and other members from both Redcliff Lodge, Medicine Hat. The splendid addresses of the President and some of the other visitors were very helpful and inspiring and were much appreciated by all the members present.

After closing of lodge, meeting a social hour was spent, during which Sister McCarty as D. D. P. presented after Martin with a little gift of remembrance from Vega Lodge, in appreciation of her visit to Redcliff.

There will be three shows at the Canoe next week. On Monday evening the picture will be "White Savers" which is said to be a screen from start to finish. On Thursday night "Forgotten Faces" will be shown. It is a melodrama and one of the best. On Friday evening, May 24th, "The Gorilla" will be shown. There will also be some comedies at each.

Mr. J. W. McQueen of Calgary, arrived in town this week to accept a position in the office of the Dominion Glass Plant here.

A liberal program of songs, recitations, choruses, stories, etc., much to the enjoyment of all present.

The new club room are admirably laid out for such a purpose. On entering there is a fine, bright reception or lounge room, with large place and tables. Off this there is a commodious private room for committee meetings or the entertainment of visitors. Then there is the refreshment room and behind it the billiard room.

Brick and Coal Loses First League Game

Team of Medicine Hat White Sox Lost Game Last Friday by 3 to 1

(Contributed)

The newly organized Brick & Coal football team played their first league game here last Friday evening against the Medicine Hat Legion team. The visitors won out by 3 goals to 1. Both teams played a good game and a noticeable feature of it was that it was very close. Referee Patterson had very little trouble keeping the game well in hand.

Although the visitors had the edge on the play all the way through, the Bricks kept them guessing and in spots showed that with a little more new work and systematic practice, they may be expected to turn the tables before the season is over.

The visitors scored their first two goals in the opening period. With the wind in their favor in the second period it looked at the start as though the Bricks would equalize. They tried hard and their efforts were rewarded when Lacey put in a dandy on a corner from Fox. At this point, however, the visitors lightened up and spoiled their chances. Shortly before the final whistle blew the visitors scored again thus winning two points in the league standing.

Expect To Gravel Hat Road in June

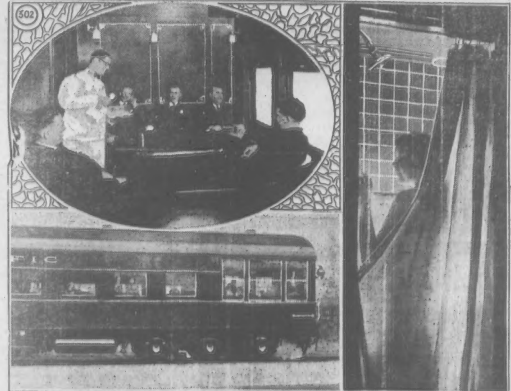

Engineer Cummings Here Looking For Highway Law Saturday

Government engineers—Commissioners and his assistant, Mr. Connors, were in town last weekend looking over the grade between here and Medicine Hat with a view of making the necessary preparations for graveling the road in the near future.

Before the graveling is done the road will be cordoned to take out the rough spots and put it in shape for the final finish.

Mr. Cummings was of the opinion that the work would be completed early in June and that the graveling could be completed as soon as possible. He is now overreaching work on the main trunk line in the vicinity of Brim.

Sunshine and Showers—New Version

Here is an interior of the men's smoking room, below a view of the rear end of the "solarium" car. The lady on the right

Over ninety thousand dollars have been spent on each of the new "Solarium" cars designed for use on the line between the Canadian Pacific Railway. Fifteen of them have been built at the Company's shops at Montreal, and the one pictured above is the "Solarium" which is one of these in use on the Trans-Canada line. These cars are given over entirely to the use of the passengers and contain, among other things, two green-tiled shower baths, a ladies lounge, a large smoking room, an observation lounge and a Solarium. This latter, which takes the place of the open platform is glazed with vitreous glass which admits all the beneficial rays, and permits an unobstructed view in luxurious comfort. The main observation lounge and the ladies lounge are furnished in various tapestries. The smoking room and the Solarium is not only a place of rest and relaxation, but also a place where refreshment is available to the dining car which is also of new and novel design.

Churches

Group meetings for boys and girls at 8 a.m.
10 p.m. Church School.
11:15 a.m. Mothers' Day Program.

Ontario Man Inherits Title

Will Go To France To Take Possession Of Property

Count Richard du Manoir, de Januise has lived for 25 years in one half of a frame house in the village of Westmore, near Pembroke, Ontario. All that time he has known he was next in line to the family estates and titles, together with the fine old Norman chateau. This property, which has now fallen to the Count on his succession in the family title is situated near Bayeux and it is his intention to leave Westmore for France and his ancestral home together with the Countess and their son and heir.

The Count, who acted as house painter and general handy man in the unpretentious village of Westmore, was known as Richard du Manoir. This is the second European title to be inherited by a Canadian within the past few weeks, the other case being that of the Earl of Egmont former rancher of Pridell, Alta.

FEELING TIRED AND DEPRESSED

Then Try the Treatment With Dr. Williams' Pink Pills

It is good to be tired after hard work or play. Rest and you will banish that kind of a tired feeling. But to be weak and tired, never to feel strong and vigorous, to be breathless at the least exertion, denotes a condition of health that must not be corrected or worse results will follow. Such a condition the doctors term anemia, and is caused by this blood impurity. The blood doing nothing else can equal Dr. Williams' Pink Pills, which enrich and purify the blood, bring new health and strength. Among those who have used this remedy, the following are the use of these pills is Mr. G. E. Williams, R. H. Elgie, etc.

"For a long time I was greatly distressed with pains in my back and felt tired and depressed most of the time. My blood needed to be purified. I took a bottle of that I slept poorly and scarcely felt like doing anything. I tried a doctor, but his treatment did not help. Then one day I read an advertisement of Dr. Williams' Pink Pills. I decided to try this remedy. I took the pills for about two months, and the result was wonderful. I gained fifteen pounds in weight and felt like a new man. I know of nothing that will build up the strength like Dr. Williams' Pink Pills, and I have since recommended them to many of my friends."

Dr. Williams' Pink Pills are sold by all dealers in medicine, or direct from Dr. Williams' Medicine Co., Brockville, Ont., at 50 cents a box. Write today for a copy of the free booklet "Build Up Your Blood."

It's not only rather he right than President of Mexico, we'd rather he most anything you could mention, except maybe judge at a baby show.

Use Man's Lament for the Flu.

The longest and deepest canyon in the world is the Grand Canyon of the Colorado River. In some places it is more than a mile deep.

Are You Ready

NURSES ADVISE

Zam-Buk, because they have proved that it does what is claimed for it. Miss M. Dwyer, midwife nurse, at 3220 Michigan Ave., Chicago, says: "I have a patient who suffered terribly with piles. Zam-Buk is the only remedy that gave her relief."

"I have used Zam-Buk myself for hemorrhoids also for sore and burns, and have the greatest confidence in it."

Zam-Buk

Explore Arctic For Minerals

Sergeant Chay, Supernumerary Mountie, Jules Private Party Staff-Sergeant Sidney G. Chay, of the Royal Canadian Mounted Police, left Toronto recently on route to the Arctic Circle. He is superannuated from the force having served 22½ years, and is going back to the Arctic region to help the Mounties but with private exploration interests. For several years he was in charge of the furthest north outpost of the R.C.M.P. On his first northern trip he started for Edmonton with dog teams and canoes as his only means of transport. This time aeroplanes and motor sledges will be used. The object of the expedition is to explore for minerals. The country around Chesterfield Inlet, northern tip of the mainland, is supposed to be rich in minerals. Chay is the wealthiest in the world. They are carrying a motor-vehicle with them. For the first three years Chay has been a successful fruit-grower at Grimsby.

Strangled With Asthma is the only expression that seems to convey the meaning of an asthmatic's trouble. The relief from Dr. J. D. Kellogg's Asthma Remedy is a good measure. Where all was suffering there comes comfort and rest. The asthma becomes normal and the bronchial tubes completely cleared. This unexcelled remedy has been many times its price to all who use it.

Ship Muskies To North China

Eight thousand live muskrats are to be shipped from the Seven Lake Fur Farm, Quebec, B.C., this summer. It is stated by officials of the company. Three thousand muskrats go to North China and smaller numbers to England, Scotland, and other countries on the continent. The Fur Company estimates that it has a total of 50,000 rats on its farm.

Ready-Made Medicine—You need no physician for ordinary ills when you have at hand a bottle of Dr. Thompson's Electric Oil. For coughs, colds, sore throat, bronchial troubles, it is invaluable. For scalds, burns, sprains it is unsurpassed. It is a household necessity. It is an unquestionable healer. It needs no testimonial other than the use, and that will satisfy anyone as to its effectiveness.

Growth Of Tree-Planting

Eight Million Young Trees Planted Annually in the West

In connection with the distribution of trees to prairie farmers in Canada and the United States, the U. S. Re-Planting Division of the Forest Service, Department of the Interior, it is interesting to note that each spring nearly 8,000,000 young trees are sent out; shipment of these trees require 2½ carloads of moss and nearly 10 miles of 45-inch barbed wire. Before many years are gone, the "treeless prairie" will be a thing of the past.

Garment Wheat Trial Shipment

Between 4,000 and 5,000 bushels of wheat has been shipped overseas, for trial in flour-making, under joint arrangements of the Dominion Department of Agriculture and the Canadian Wheat Pool. The future of this type of wheat will largely depend upon whether this present lot meets with favor among the millers of Great Britain and Germany.

An OIL OF MENTH—Dr. Thomas' Eucalypti Oil is not a bundle of mineral substances thrown together and sold as a cure-all. It is the result of the careful investigation of the healing qualities of certain oils as applied to the human body. It is a rare combination and it wins and holds the public favor from the trial of it will carry conviction to those who doubt its power to cure and heal.

Employer—"Can you show a recommendation?" Job Applicant—"Why, er, I have no recommendation to offer, but I can show you a testimonial."

Even a man of steel may lose his temper when he gets hot.

Minnard's Liniment for Coughs and Colds.

Talking Postcards

Latest in England

Will Be On Sale Shortly At Three Pence Each

"Talking Postcards" will in future, make it possible to dispense with ordinary printed greeting cards at Christmas and on birthdays. The latest novelty is a very small gramophone record printed on a picture postcard. It is about three inches in diameter and looks like a thin brown flannel, but is shaped and marked like an ordinary record. It can be sent by post for a penny and on arrival at its destination it will deliver its message of greeting by being played on a ordinary gramophone. Messrs. Raphael Tuck, the post card publishers, confidently expect their gramophone post cards to be the novelty of the year. They will be put on the market shortly at three pence each and there is to be a great variety of them. At present, there are ordinary songs like "Annie Laurie" and "Auld Lang Syne," special holiday numbers and a new pattern of songs that never change from the force having records, also, are stamped on calendars, and there is scope for further development of this invention in many different ways.

At forty a man wishes he knew what he thought he knew at twenty.

Toes Made Comfortable Sore Corns Removed

Quick, safe relief is almost instant when you apply PUTMAN'S CORN EXTRACTOR. Shows warts, blisters or corns. One single drop of the PUTMAN'S CORN EXTRACTOR will remove the corn and stop the pain. PUTMAN'S CORN EXTRACTOR gives satisfaction. Thousands use it and get relief. Get a bottle from your druggist. Refuse a substitute for PUTMAN'S the one sure relief for sore corns.

Canada's Mining Advance

From a comparatively obscure position in 1900 with a production of less than \$60,000,000, Canada is steadily advancing to the front ranks of the mineral-producing countries of the world with a total production in 1928 valued at \$271,000,000.

Going Upstairs Had to Sit Down Breath So Short

Mrs. H. Brumstead, Major, Q. C., writes: "For many years I suffered with shortness of breath. I had to go upstairs and I had to sit down at the top of the stairs. I read about

MILBURN'S HEART NERVE PILLS

so I got a box, and in no time I felt better. I took three boxes more and I have never had shortness of breath since."

Price 50c a box at all druggists and dealers, or mailed direct on receipt of price. The T. Milburn Co., Ltd., Toronto, Ont.

Employees in German mines have increased in the past few years from 100,000 to 200,000.

The indications of worms are restlessness, grizzling of the teeth, picking of the nose, extreme peevishness, often convulsions. Under these conditions get the best medicine that can be got is Miller's Worm Expeller. They will attack the worms as soon as administered and they pass away in the evacuations. The little worms will be immediately eased and a return of the attack will not be likely.

Northern Ireland now has two and one-half miles of highway to every square mile of land.

Canada's Opportunity and Responsibility

It has been said times without number that Canada occupies a paramount and responsible position as interpreter of Great Britain to the United States, and of the United States to Great Britain. Such views have been expressed, not so frequently by Canadians themselves as by leading men in Great Britain and the United States.

Within the past few years the opinion has been expressed by leading citizens of the Empire and of China, Japan, and other oriental lands, that Canada, because of its geographic position and its rapidly expanding trade across the Pacific, likewise occupies a strong position as interpreter of the Orient to the rest of the Empire. Canada is popular in China and Japan as compared with the United States and European countries.

In the councils of the League of Nations this Dominion also stands high, and deservingly so. It is recognized by other countries, and more particularly the smaller nations, that Canada has no selfish purpose to serve through its membership in the League; that, on the contrary, the Canadian attitude is one of disinterestedness, based wholly in a desire to render service to mankind. The Canadian position in the League has always been for peace, conciliation, recognition of the rights of others, and, especially, not merely fair treatment, but open generosity and sympathy for minorities.

Because of this unselfish attitude, Canadians are welcome in all lands, and the high opinion entertained for this country is proving a real asset to the business and commercial interests of the Dominion in the opening and development of foreign markets for Canadian products.

Now, one of the most influential men in India, Sir Rahimdrath Tagore, the world renowned poet, outlines to Canada a duty which rests upon this young Dominion, not only to itself, or to a group of nations, but to wide world. Sir Rahimdrath was a distinguished poet and speaker at the recent Conference of the National Council of Education held at Vancouver, and in his farewell message to Canada he gave expression to views which Canadians everywhere may well read, ponder over, and to which they should give heed.

"Canada," he said, "is too young to fall a victim to the malady of disillusionment and scepticism, and she must believe in the great ideals in the face of contradiction—for she has the great gift of youth; she has the direct consciousness of the stir of growth within her which should make her trust herself, which is the only sure way of trusting the world." "How true this sentiment! A man or a nation which does not trust himself or itself, but lives in an atmosphere of fear and suspicion, can never trust others.

Continuing, this great Indian saint said: "Let Canada feel the sacred dawn of her life, that the expectation of human destiny is upon her as upon other sister countries which have just entered into the cycle of their promise." Canada will have to solve for the salvation of man the most difficult of all problems, the race problem, which has become insistent with the close contact of countries that had their isolation for centuries. Their geographical and cultural exclusiveness, Canada will have to reconcile the efficiency of the machine with the creative genius of man which must build its paradise of self-expression, reconcile science with religion, individual right with the social obligation that it must acknowledge, the must dream of the introduction of honesty even in politics, which is the self-interest of the nation, knowing that such interest can only have its source foundation in international friendship, she must ever hope to be able to win the heart of the world by offering the best that she has produced."

Although his actual knowledge of this country was limited, Sir Rahimdrath said Canada possessed powers of character and material resources that would enable her to carve out a destiny free from "the fatigue that old civilizations suffer from in the shape of cynicism."

This is an inspiring vision of Canada's place in the world. It is one that calls for the best that every citizen, regardless of his race or creed, can contribute. And it is because the Canadian people of tomorrow will be a development of the cosmopolitan population of today that the Canada of the future will find within itself the ability, the sympathy, the international viewpoint, which will make possible such a great contribution to the future of mankind and the ultimate and lasting peace of the world, for, until the race problem is solved there can be no peace in any country, or in the world at large.

Sleepers in Buses

Line Between Buffalo and Cleveland Has Comfortable Berths

A bus with sleeping accommodations was exhibited in New York recently. It has gone into service between Buffalo and Cleveland, according to the Great Lakes Stage Line, which operates between these cities and Philadelphia and New York. The bus will accommodate eighteen persons in six double, and six single berths, all with outside ventilators. An electric ventilating system changes the air every five minutes.

There are three trying periods in a woman's life when the girl matures to womanhood, when a woman gives birth to her first child, when a woman reaches middle age. At these times Lydia E. Pinkham's Vegetable Compound helps to restore normal health and vitality.

Lead Household Treasures

Royal Family Very Generous With Things For Exhibition

An instance of the true democracy of our Royal Family is surely to be found in the way in which their household treasures are nowadays laid ready for exhibition to the public. After the Lansdowne House collection of domestic art treasures, comes the Loan Exhibition of old English plate at 25 Park Lane. Sir Philip Sassoon's London home, to which the Queen, the Prince of Wales and the Duke of York have lent household silver which members of the public would never otherwise have been privileged to see.

Policeman: How did the accident happen? Motorist: My wife fell asleep in the back seat.

When your Children Cry for It

Baby has little upset at times. All your care cannot prevent them. But you can be prepared. Then you can do what any experienced nurse would do—no more physician's visits. Tell you to do—give a few drops of plain Castoria. No more than Baby is needed; relief is just a matter of moments. Tell you have said you will build without use of a single cathartic drug. Castoria is vegetable. No it's safe to use as often as an infant has any little pain you cannot put away. It's always ready at the cradle's side for colic, or constipation, or diarrhoea, or even, for old children. Twenty-five million bottles were bought last year.

BEAUTY AND DA

Clean Up, Paint Up, Keep It Up --- Increases the Value of Your Property

THE USE OF DYES is in the dyeing!

Words won't dye a dress, coat or curtain. It takes real skill to do that. That's why Diamond Dyes contain from five to five times more dyes than any other dye-by actual test. It's the skill in Diamond Dyes that do the dyeing. They give the colors such brilliancy, such depth and permanence. It's real skill that keeps them from giving things that they dye look, from spotting or streaking.

Next time you have dyeing to do, try Diamond Dyes. They are easy to use. See how soft, bright, new-looking the colors are. Observe how they keep their brilliance. Your dealer will refund your money if you don't agree Diamond Dyes are better dyes.

The white package of Diamond Dyes is the original "all-purpose" dye for any and every kind of material. It will dye red, blue, green, yellow, orange, or any mixture of colors. The blue package is a special dye for silk or wool only. With it you can dye your valuable articles of silk or wool, and still retain the fine professional work. When you buy—remember this. The blue package dyes silk or wool only. The white package dyes all kinds of goods, including silk and wool. Your dealer has both packages.

Why Cement and Plaster Need Painting

It is seldom one sees a cement, concrete, stucco, plaster or brick surface painted. It seems to be the general assumption that these substances are amply able to protect themselves from weather and other destructive conditions.

But that is a mistake. It is well known that cement is a moisture absorbent, and it isn't true that its moisture does not harm it. It is almost as important to prevent rain from penetrating the surface of these rough mineral outsiders as it is to protect wood and iron from rain. But just as any kind of paint will do it. It must be a special cement paint having a chemical composition not affected adversely by lime or alkalies.

It is important that owners of commercial and manufacturing buildings, grain elevators, residences, garages, silos, etc., with absorbent outside surfaces, should realize the advantages of painting them—that they will last longer, look better and need fewer repairs after being so treated.

Many accidents happen from warming vapors and other mixtures that contain inflammable liquid. Almost every day it happens. "Explosions" does not seem to be the best word to use, however, for it is discovered that such "accidents" (rather wrong descriptive word), are usually the result of want of common horse sense.

Anybody should know that to place highly inflammable substances like turpentine and benzine by a hot or even warm stove is more than likely to cause an explosion. "She was heating a pot of varnish on the stove and it exploded." Of course it did, did she think it would simply boil over, like a pot of soup?—Painter's Magazine.

Moore Jay Board Of Trade

The recent three days' drive for membership in the Moore Jay Board of Trade, with an objective 1,000 members, went over the top with 1,200 paid up members secured.

Lady in library: "Have you been reading Longfellow?"
Roughneck: "Nav, only about ten minutes."

Excess acid is the common cause of indigestion. It results in pain and sourness about two hours after eating. The quick corrective is an alkaline which neutralizes acid. The best corrective is Phillip's Milk of Magnesia. It has remained standard for its invention in the 50 years since its invention. One spoonful of Phillip's Milk of Magnesia neutralizes instantly many times its volume in acid. It is harmless and tasteless and its action is quick. You will never need any other method, never continue to suffer, please try this new method. Please let it show you now.

Clean Up Every Yard

The pupils of the schools should be thoroughly sold on the idea that they have a definite part in the work of cleaning up and painting up. Many a father will reward his boy handsomely for having the cleanest and neatest backyard in the neighborhood.

The girls will find a new delight in putting the flower boxes in order, washing the woodwork, and otherwise helping mother to make the outside looking as good as the inside.

Every yard should have the weeds removed. The lawns should be mowed and raised, the shrubbery pruned, the hedges trimmed, and all rubbish carried away or burned.

If there are any little trellises in the yard, they should be painted and then them up. A pool of stagnant water, a foot square can easily give birth to a swarm of fever carrying mosquitoes.

Spun Cream
1 1/2 cups Borden's St. Charles Milk diluted with 1 1/2 cups of water.
1 1/2 teaspoonful salt.
1 1/2 cup sugar.
1 1/2 teaspoonful granulated gelatin.

1. tablespoonful vanilla.
Let the gelatin stand in the milk for five minutes, then add the milk. Combine the egg-yolks, sugar and salt with the scalded milk, and cook until slightly thickened like a custard. Then stir the mixture into the egg whites beaten stiff; add the vanilla. Turn into individual molds which have been dipped in cold water and when set unmold and serve with light cream, or any preserve fruit.

Demand For Farm Machinery

Implement houses at Moose Jay and Swift Current are experiencing a busy at the present time filling orders for spring farm machinery. It is understood that the International Harvester Company will have at least another twenty carloads of machinery shipped into Swift Current this spring, while the Massey-Harris Company is also handling a heavy movement.

Austria produced in the past year nearly 15,000,000 pairs of shoes.

times its volume in acid. It is harmless and tasteless and its action is quick. You will never need any other method, never continue to suffer, please try this new method. Please let it show you now.

Had Thought For Troops

Prince Of Wales Countermanded Order For Parade Owing To Weather

On the day the Prince of Wales presided over the first Royal levee the year at St. James's Palace, London, elaborate ceremonial had been arranged. He was to drive in a silver and gilt coach from Buckingham Palace, the King's London residence, to St. James's Palace, attended by a squadron of the Horse Guards in parade equipment, and including highly polished steel cuirasses and enormous busbies.

The weather turned intensely cold, and the discomfort this parade would have occasioned—not to himself, for he would have been well sheltered in the coach, but to the troops that were to take part—at once appealed to the Prince. Half an hour before the ceremony was to begin, therefore, he quietly countermanded it, and walked from the modest backdoor quarters, he occupies in York House near by. Little was said about this at the time, but of the 47,000,000 inhabitants of a small group of islands in the western seas took note of it and approved.

Home Decorations

A little money goes a long way in furnishing a home if it is wisely spent. A plain painted wall in a light, pleasant color, or light-colored monotone or neatly patterned paper, does not cost very much, but does a long way toward giving a room a fresh, smart appearance.

Bright colored cretonnes add a note of gaiety and cheer to window shades or cumbersome pieces of furniture can be replaced by inexpensive wicker or rattan furniture. Nonpareil chairs, stables and tables can be painted pleasant colors, giving accent to the furnishings of the room. Work-up upholstery can be covered with slip covers of denim or cretonne, or reupholstered in inexpensive wool or bright linen adorned with wood embroidery or applique add to the up-to-date appearance of the room. Wall designed scatter rugs, rag mats, and the delightful new linoleum make charming and inexpensive floor coverings.

Air Service From Seattle To Alaska

Proposed Course Via British Columbia Has Been Surveyed

The International Airways will start a passenger service from Seattle to British Columbia and Alaska this summer, operating eight or ten-passenger seaplanes, P. T. McCarty, president and general manager of the company announced. The service will include stops at Vancouver, Prince Rupert, Keetchikan and Juneau. A branch line may be extended from Juneau to Sitka.

Mr. McCarty and a party of four others completed a survey trip of the proposed course, making a round trip from Seattle to Juneau by seaplane.

Invents New Auto

British Engineer Claims Machine Capable Of Great Speed

Amhurst Villiers, young, British engineer, is reported to have completed the design of a motor car which he will take to Dayton in 1931, with a guaranteed speed of 300 miles an hour and a theoretical maximum speed of 400 miles.

For the first time wireless will be used for steering, but the details of this were kept secret. The engines will have 2,000 horsepower, and the car will be fitted with eight wheels. Prominent British financiers are providing the money.

— Was Very Careful
A man had recommended a friend of his for a job. "Be fond of work," said the manager of the works. "Fond of it?" cried the friend and champion, "I should say he was! I never saw a man who could take such good care of work as he does. One piece of work will last him for a week!"

Checked without "dosing" Rub on Vicks Vapo-Rub

Point Pointers

When applying shellac to knots and sappy places, do not apply it in too heavy a condition. Apply it thin and brush well into the knots and other places that require shellac.

It is quite common to see painters brushing shellac, not only over knots, but two or three inches beyond. This is a bad practice and should be avoided. Use a small sand-blot for knotting and confine the shellac to the surface of the knot.

On woodwork that is to be finished in white or in any light shade, use white shellac for the knots.

Before priming a surface be sure it is thoroughly dry and in proper condition to receive paint.

When painting, always have a clean rag to keep the hands clean and remove spots from windows, hardware fittings, etc.

A small quantity of raw linseed oil rubbed over the hands before commencing work will prevent the paint drying hard on the skin and make it easier to wash off.

Do not use a cheap primer. It may be cheap as to first cost, but it will be costly in the end.

When painting, always have a clean rag to keep the hands clean and remove spots from windows, hardware fittings, etc.

Pictures and Mirrors

Give Finishing Touch Pictures serve an admirable purpose in the decoration and furnishing of the small home.

By the very nature of their location on the wall they occupy none of the floor space that is so valuable in the small dwelling. If a little room has been rather crowded with furniture, pictures on the wall carry the eye upward and bring the attention from the lower part of the room to the upper, where there is a greater appearance of space.

Then, too, the subjects of the pictures may be chosen with a view to increasing the apparent size of the room. Pictures with a rather deep perspective give the eye a feeling of looking into the scene, down a corridor, into a valley, along a river, or otherwise creating an appearance of distance.

To do this removes much of the cramped feeling that invades a small room overcrowded with furniture.

The choice of color in pictures also will have much to do with the decorative scheme of the room, and the same effect of perspective may be created with the judicious use of mirrors.

The Part Paint Plays

Where poverty lives, there, fifth about the world, is the small, that a long time ago and it is quite true today. The solidity and prosperity of a town, or its poverty and shabbiness, are indicated by its physical appearance.

"Paint and Pride Are Partners," is one of the slogans of the "Clean Up and Paint-Up Campaign," and it is a good one. "The greatest incentive to cleanliness is paint," is another true one.

Any community cleaning that lasts requires the paint brush even more than the scrub brush. Walls and other surfaces which are properly painted, enameled or varnished, are washable. They are easier to keep clean.

Good paint and varnish reduce the labor of keeping clean, promote pride, inspire pride of ownership, multiply the joys of living and increase property values. There is no better time to paint up than when you are cleaning up, and there is little hope of keeping your premises cleaned up unless they're painted up.

The Dandelion Digger

The dandelion is a pretty little flower for a few hours. Then the blossom becomes an unsightly tuff of seeds which are lifted by the wind to be blown and blown over the yard or throughout the neighborhood. Then the dandelion soon becomes an unsightly weed which disfigures an otherwise beautiful lawn.

Dandelions attract mosquitoes and other undesirable insects. Get rid of the dandelion by mowing the services of the children! Organize them into an army of dandelion diggers.

Any self-respecting home owner will pay the little tax ten to twenty-five cents per hundred for dandelion and other weeds that mar his lawn. You can appeal to the pride of the little folks by making them soldiers in this special army of fighters, and you will please them by a small cash reward for their work.

Grocer: "Then you don't want cranberries?"
Customer: "No, I've changed my mind. I see your cat is asleep on these cranberries."

Grocer: "Oh, that'll be alright. I don't mind wakin' the cat up."

A biologist has declared that the ape is not man's ancestor, and that ought to be comforting to the ape.

A pall of hot or cold water and Alabastine are the only ingredients required to give a beautiful permanent wall finish. Opaline effects may be easily attained.

Building Speedier Cars

Forty Miles On Highways No Longer Considered Good Roads

Reading the automobile advertisements, it is not uncommon to see certain manufacturers proclaim as one of the merits of their "high priced cars that they will do seventy and eighty miles an hour. Now, an automobile expert states that within the next ten years cars will be built for the public highways—not for the speed track—which will do one hundred and twenty miles an hour or more.

One may ask, "Why?" Not so long ago speeds of thirty to forty miles on the roads were considered good going, and most drivers were satisfied with that rate. But in the stress of competition, manufacturers began turning out cars of higher speed, going one better than their competitors, although the laws of the land did not require anything like the speed named.

There is no law against building autos to sell for use on the highways which are capable of tremendous speeds, and the producers are careful to exploit the fact of their speed, providing "a substantial reserve of power for hills," or some such claim as that.

And no speeds are greater—and the death trail grows higher every year.

It seems incumbent for governing authorities to pass laws limiting the speed of autos, and to take no action whatever against the production and sale of autos which can travel twice as fast as the maximum allowed.

But the time must come, if cars are to be built that will do one hundred and twenty miles an hour on the roads, when public bodies will have to take some action. Highways are not built for such speeds—and undoubtedly men who have cars equal to that speed will find their power on clear roads, and the alternative is to build super-highways for super-cars.

It is taking governments all their time now to cope with the present highway needs, and unless they are to be forced into a new program of costly highways within the next ten or twenty years, there will have to be some general legislation to limit the speed capacities of automobiles of the future.

A Valuable Hen

Harred Plymouth Rock At Saskatchewan University Sets New Record

Record The poultry department of the University of Saskatchewan announced the poultry world, last year, was a harred Plymouth Rock hen that laid 309 eggs in her pullet year. This was a record for a hen of the heavy breed. A daughter of this hen seems likely to beat her mother's record. Hatched on February 23, last year, she laid her first egg on September 3, up to April 12, she has laid 215 eggs, which is 10 more than her mother had laid up to the same corresponding date. During November, December and January, she laid an egg on 71 consecutive days.

Makes Model Of Devon

Englishman Has Reproduced Every Detail With Simplest Tools

With the simplest hand tools, an Englishman named Martinelli, has made a remarkable model of Devon and the surrounding country.

Over 50,000 parts have already gone to make up the completed model. Highway courses consist of 1,000 separate parts, and are complete even in the views and mirrors over the seas. The wheels of a motor, although only the size of a penny, have twenty-eight spokes. When complete the model will be 30 feet in length.

Publisher: For me to publish now, the author must have a well-known name.

Author: That is all right, mine is Smith.

"How old are you, little one?"
"I don't know, mother, I was 30 when I was born and now she is 38."
—Dana Hume Madrid.

W. N. 1. 1782

Growing Flax For Seed

Canada Is Supplying Requirements Of Irish Flax Growers

During the past two years seed flax has been produced in Canada for the requirements of Irish flax growers, and, according to the Minister of Agriculture, further progress in establishing this market was made in 1928, some 1,200 bushels of seed having been shipped. Because of certain factors, the Irish climate, while suited to flax production, is unsuited for seed production, and Irish authorities became interested in the possibility of Canada producing their seed. Initial efforts, have been attended with gratifying results. What this stimulated interest in the production might eventually mean to Canada may be gathered from the fact that requirements run to 5,000,000 pounds of seed annually.

With this trade in view, experimentation was commenced in 1927 with a new variety of seed known as J. W. S., developed by the Linen Research Institute of Northern Ireland. The first three divisions of the Experimental Farms have been engaged in growing this as a flax crop. These parts of the Dominion, where climatic conditions had been proved favorable to the production of flax of good quality and yield. This stimulated interest in the production of flax fibre in Canada, and its cultivation is making some progress at the present time.

The chief domestic use of Canadian flax fibre, says the Brandon Free Press, is for the production of paper. The flax fibre is used in the form of paper pulp. The Canadian linen industry could absorb a greatly increased supply, and the flax fibre in the form of "green tow" was exported to Scotland for use in the linen industry by a new process, and this market is stated to be promising.

Canadian Wheat Grades Higher

North From Here To Ten Cents More If Shesol Than United States Wheat

Before the Senate committee on Agriculture at Washington, in connection with the farm relief hearings, H. J. Beasley, in charge of the grain division of the United States Department of Agriculture, said that in the world market Canadian wheat was worth from five to ten cents more than United States wheat of the same comparative grade. He said this was due to the general opinion of world buyers as to the excellence of Canadian wheat.

Mr. Beasley was asked many questions by the committee as to comparative prices on wheat between Minneapolis and Winnipeg and he finally summed the situation up by saying that the buyers in the world market put value of Canadian wheat five to ten cents higher.

Moose Is Domesticated

Has Been Grazing With Cattle On Alberta Ranch

The Rio Alta Ranch in Alberta has an unusual visitor. Feeding loosely, a fine moose has come down out of the Rocky Mountains, and has been grazing with the cattle. It is being watched with interest by the manager of the ranch and appears to be on quite friendly terms with the cattle and mixes with them freely.

The herd take the stranger's coming as natural and do not interfere with it in any way. They have little right to, for they are prairie swarms of a kind, which once were wild.

Among untamed peoples, the Indians counted their day from sunrise to sunset, the Hebrews and Athenians from sunset to sunset, and the Romans from midnight to midnight.

The tourist learns at sea that in steamship terminology a gale, a storm and a hurricane are not the same thing. A gale blows 60 miles, a storm 70 miles, and a hurricane 80 miles an hour.

Friend: "What did you do about that woman who was arrested for speeding?"

Judge: "I followed the old proverb."

Friend: "What do you mean?"

Judge: "Fined the woman."

Pretty Waitress: "Are you the pretty husband?"

Suspicious Diner: "No, the lonely one."

Solicitor: "Is it true your wife agreed to this?"

Witness: "I can safely say 'No,' she does not agree to anything."

AN EASTERN SAGE

Although now nearly 70 years old, Bahadurram Tagore is still asserting his declining days on the slope of the university which he has founded in India, at Santiniketan, "The home of peace." He attended the educational conference held recently at Vancouver, he having undertaken this mission at the invitation of the society of India.

Canadians Use Franchise

Larger Avenue Vote Than U.S. Or Great Britain

Figures show that about seven out of ten qualified Canadian electors cast their votes on average for each election. This is a creditable percentage as compared with the United States, where the average percentage is 45, and Great Britain, where it is only 50. Yet in compulsory voting there are dangers which make it too risky an experiment to be worth trying because the masses who are driven to the polls in obedience to the law may comply with the will of the electors who have given careful thought to the issues.

Three Of A Kind

A man and his wife were returning from Europe. The man died on the boat and a collection was taken to help the widow. When the captain counted the money he found he had \$600.23. "There must be a Dutchman on this boat," said the captain.

"Yes, sir," replied a voice in the crowd, "there are three of us."

College Nephew: "One thing Uncle, you've got to admit that college makes a man think."

Uncle Ben: "Yep, it makes him think he's better than anybody else."

"Never despair, behind the clouds the sun is still shining."

"Yea, and below the sea there's a world bottom, but that doesn't help you any if you fall overhead."

Sweden's Forestry System

Could Be Copied With Profit By Other Countries

The people of Sweden have been celebrating the one-hundredth anniversary of the establishment of their present governmental system of forestry.

But scientific forestry is no matter of a mere century with the Swedes. As early as the year 1584 Sweden, by royal edict, was beginning to put restrictions upon the indiscriminate cutting down of trees.

In the year 1587, royal letters commanded that for each felled oak or beech tree two other trees of the same kind should be planted.

A great meeting was held last summer at the Swedish College of Forestry, and experts from many countries, including several from the United States, were present to hear the Swedish foresters, tell how forest crops may be harvested while the nation's forest resources continue to improve. A general forest survey in Sweden showed that the reserves of timber are greater even than had been supposed. About half of Sweden's exports today are forest products, and the demand is none too favorable, and there is hardly a usable land enough to produce its own food supply, Sweden is one of the most prosperous countries of Europe. The Swedes know how to make the most of their resources. This is shown by the forestry statistics, the annual growth now exceeding the annual cuttings.

A Good Smuggling Scheme

Smugglers Brought Into Britain As Deceitful Of Handkerchiefs

English customs officials are determined to stop the smuggling of silk into Britain. Recently a London firm received a consignment of children's handkerchiefs. The handkerchiefs were described as cotton. So was the unembroidered kitten in the corner of each. They were the firm received a stern letter from the authorities warning them that they would be fined if the offence occurred again. An enterprising official had discovered that each cotton kitten was provided with four tiny silk whiskers.

Turner Valley Oil Field

Novella, (Imperial Oil Limited) is now drilling 30 wells in Alberta, thirteen in the Turner Valley field, on the Highwood River, one along the Bow and one down in the Surf field near the Montana border. The 229 programme calls for the drilling of twenty new wells.

Magistrate: "You say defendant of you hit three times and knocked you witness?"

Witness: "He did, sir."

"And what did you do then?"

"I asked him if he'd finished."

ADMIRAL'S SON COMES TO CANADA

Buttermilk for laying pullets was proved at the Brandon Experimental Farm to be superior to beef scrap or alfalfa leaves as a protein supplement. The pens under test were fed fifteen parts of beef scrap in the mash, or buttermilk or alfalfa leaves provided in a self-feeder. The tests were continued from late fall until the 11th of the following April. All of the birds received standard scratch grain mixture and dry mash. The results of two tests indicated the superiority of the buttermilk, as the pullets given as feed as a supplement to the usual ration laid an average of 11.9 eggs more per bird than those that received a protein supplement to the usual ration. According to a table that appears in the report of the superintendent of the Brandon Farm, for 1928, eggs were produced at the lowest feed cost when buttermilk was fed, followed by beef scrap, alfalfa leaves, and the check lot when no special protein feed was given.

Lured by Canada's vast open spaces and her wonderful possibilities Edward Grenville Barwell Kiddie, son of Admiral Sir Charles Kiddie, R.N., has come to Canada to take up farm life. He was one of a party brought from England on the Cunard Line "Anania," recently arriving at Halifax and boarded a Canadian National Railway train for his destination in the Canadian West. Sir Charles is of the opinion that farming in Canada offers a great future. The Admiral's son was employed with a firm of chartered accountants in the Old Country before deciding to take up farm life in Canada. The party was gathered under the auspices of the British Immigration and Colonization Association with the aid of the Colonization Department of the National Service.

Huge Trade In Oranges

Single Tree Produces From Two To Three Thousand Yearly

When you are enjoying your orange, do you ever think of the bones and peculiarities of the popular fruit. We have all been familiar with the pipkin skin, the blood, or ruddy orange, the dark and bitter one from sterile for marmalade purposes, and the little "Tangerine." But the oranges are the natural fruits of the trees? And whence come our supplies? Some of them come from Spain, and large quantities of oranges are sent from Africa, Florida and California. "The leaves of the trees are evergreen, and do not change color or fall off in the autumn, as do the leaves of most trees. They are dark and shiny, and if we were to look against the light you would see it was covered with small transparent dots, similar to the rind. There are small cells containing oil, which is pressed out and used. The blossom is like white wax with a bunch of threads with golden beads in its center, and has a delicate scent. And as to the wonderful yields of the fruit, when it is explained that a single tree produces as many as one thousand oranges in one year, and that a very fine one as many as three or four thousand, one need no longer be surprised at the huge trade that is carried on in oranges.

Better Production Higher

Increase In Saskatchewan Output Over March Of Last Year

Maintaining the high level of country butter production, which has been one of the outstanding agricultural developments of recent months, butter output in Saskatchewan for March was 145 per cent higher than for the corresponding month of 1928, the increase being from 177,747 pounds to 255,700 pounds.

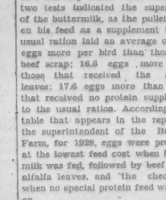

Consistent in the dairy industry of the province are very encouraging. P. E. Reed, dairy commissioner at Saskatoon, said that 1929 will establish new high records. It cannot be expected, he states, that because increases of more than 100 per cent, have been reported in each of the last four months, the production for 1929 will double that of 1928, but present indications lead to the belief that it will be a 25 per cent increase for the year will result.

Mr. Reed attributed the gratifying progress dairying has made recently in part to the elimination of unprofitable producers from the dairy herds of the province. This culling of the "star herds," has been made possible by regular testing for milk and butterfat production and the keeping of herd records.

Buttermilk For Laying Hens

Eggs Produced At The Lowest Feed Cost

Buttermilk for laying pullets was proved at the Brandon Experimental Farm to be superior to beef scrap or alfalfa leaves as a protein supplement. The pens under test were fed fifteen parts of beef scrap in the mash, or buttermilk or alfalfa leaves provided in a self-feeder. The tests were continued from late fall until the 11th of the following April. All of the birds received standard scratch grain mixture and dry mash. The results of two tests indicated the superiority of the buttermilk, as the pullets given as feed as a supplement to the usual ration laid an average of 11.9 eggs more per bird than those that received a protein supplement to the usual ration. According to a table that appears in the report of the superintendent of the Brandon Farm, for 1928, eggs were produced at the lowest feed cost when buttermilk was fed, followed by beef scrap, alfalfa leaves, and the check lot when no special protein feed was given.

The Important Hen

"We had a fine motor trip! We saw snow-covered summits leading toward the heaven; we saw flaming torrents raging through the bottoms of shadowy canyons; we looked down from beetling crags into the depths of limpid lakes; we traversed sunny glades shot with flashes of golden sunlight; we—"

"How many miles to the station did you do?"

Demand For Farm Horses

There is a good demand for horses of from 1,250 to 1,500 pounds, though scarcely any demand at all for light-weights of from 850 to 1,000 pounds. Several carloads of the former have been shipped from High River to the United States, and Quebec at prices averaging \$65.

The Red Cross In Review

Important Work Accomplished In Connection With Voluntary Soldiers

Looking down on the world's hardships through the eyes of the trained Red Cross worker, there are sights and sounds that are unforgettable in their poignant appeal to the heart. From the white coats, row on row in the soldiers' wards, the voices of men whose manes are stirred at the sight of the familiar badge of Red Cross visitors, bringing back as it does the scenes "over there."

Today, peaceful indeed is the Red Cross field of action for these unfortunates. The presenting of gifts of a loving and friendly public, who through the "Red Forgetting Fund" of a daily newspaper offer their tribute of gratitude for the sacrifices that no money can ever repay.

In the Edmonton Red Cross Hut, too, with its fine new floor laid by the convalescent soldiers themselves, and its comfortable money-making chairs, may be seen a handsome radio receiving set of modern make, the gift of the University Broadcast Station C.I.T.

"Still serving the soldier" is the slogan of Red Cross even after ten years. In the Red Cross, the ways will be much to do to ease the burdens of those who bear the brunt in the hectic days of war.

From reviews of the soldier's needs in hospitals, the Red Cross passes on to those soldiers of the world, who, under the flag, are living in the tents of the west. Large families of the smaller children seem the rule with the soldier settlers, and in the homes of these Red Cross pioneers, the Red Cross finds much important work to do.

Special protective care centres round the mother, for she it is who is giving the greatest gift and most difficult to her country by adoption—the gift of a new life.

"When baby comes," with the attendant anxieties of childbirth, then comes the Red Cross pioneer, a helping hand to the British settler, and comforting and reassuring the young protective mother in her hour of need.

Outposts stand ready for her reception, and for the care of sick and injured ones who face the challenge of life far from civilized centers.

One such northern hospital at Peace River, 80 miles from the end of steel. It draws its patients from an area of 300 miles. An Alberta Red Cross nurse, living in that district, expressed his surprise and delight at finding in that remote place this up-to-date modern hospital, with electric light, running water and baths. Records show that the district uses its hospital to the limit, its eighteen beds being filled to capacity almost all the year round. Never has the Red Cross flag waved so proudly than it does over this community where its students of human compassion provides over the gates of life and death in the hospital wards.

The above were one or two high lights of the Alberta Annual Red Cross Convention in the city of Edmonton, where the Commissioner told what is being done for soldiers and settlers under the peacetime program of today.

"I have no more confidence in women."

"Why not?"

"I put a matrimonial advertisement in the paper and one of the replies was 'No more in my life!'"

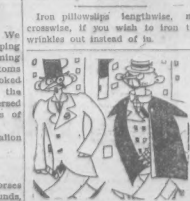

Mother: George, bring haly in to have his dinner.

Little George: He doesn't need his dinner, mother. He has just eaten a worm.

Scrubber's Wife: "What did the editor say about your poem on spring?"

Scrubber: "Too slummy."

Iron pillowcase tearfully, not knowing if you want to know the wrinkles out instead of in.

"Men who grumble about their mother-in-law are just like the men who grumble about their mother-in-law."

"Does she live with you?"

"No, she lives in the Philippines Islands." —Dana Hume Madrid.

The World's Treasure House

Value Of Treasures In City Of London Cannot Be Calculated

Despite the power of New York in the world of finance, London is still the treasure house of the world. Its houses and stores are crowded with jewels and treasures of incalculable value.

Within one-half a square mile of the west end district is treasure of the value of the city is estimated by insurance companies at \$1,000,000,000.

Some of these treasures are worth thousands and thousands of dollars, and London would be a veritable Aladdin's cave for the hordes of international crooks and thieves which are congregating there, but for the strict precautions taken to guard them.

Figures in connection with the value of the national collections become almost astronomical. It is impossible to value the treasures of the British Museum, The Elgin Marbles, for instance, are valued at \$10,000,000.

The British Museum, in terms of money, runs into hundreds of millions. Fifty million dollars would not buy the Wallace collection today, and twice that sum would be insufficient for the treasures of the National Gallery.

If the Victoria and Albert Museum at South Kensington could be replaced, every cent of \$200,000,000 would be required. The pictures in the National portrait gallery would fetch at least \$20,000,000 and are in the Dulwich collection are worth at least \$75,000,000. In the Museum there is another \$10,000,000 worth.

In the Tower of London, apart from the crown jewels which are worth about \$20,000,000, there are wonderful specimens of armor. One suit of German 16th century armor by Topf has been valued at \$100,000.

All these treasures can be seen by the public with perfect freedom and not a single article in the national collections is insured against fire or theft. The reason is clear.

In the first place, the pictures and other treasures are fireproofed, and, secondly, the charges would be colossal.

Some of the houses in Mayfair contain valuable work of a king's ransom. For instance, there is Lord Ellesmere's collection of pictures at Bridgewater House, said to be worth at least \$50,000,000.

The wealthiest part of London, according to an insurance expert, lies between Lower Regent Street and Piccadilly Circus on the east, King Street on the south, Berkeley Square on the west, and Oxford Street on the north. Today the treasures and other property in that half a square mile are worth \$1,100,000,000.

First Married Man: "So you run your household on a businesslike basis?"

Second Married Man: "Yes, I'm the assistant manager."

Guard Against FLU — Sore Throat The First Warning.

Few families will escape. This epidemic constitutes a real danger. Health authorities everywhere warn the public of the danger of the common cold. "Flu" usually starts with Sore Throat. Unless the germs are killed by some antiseptic treatment a serious malady may develop.

A simple treatment is to gargle with the throat three times daily with Nerville. The antiseptic properties of Nerville quickly destroy the germs in the throat. Of course if the chest is sore Nerville should be rubbed over the affected area—lots of rubbing—it can't burn a blister, but will bring out the congestion and break up the cold.

To prevent "flu" or colds from gaining headway Nerville will prove most effective. It is hardly necessary to point out that the bowels should be stimulated, and the system purged of all waste material. For this purpose Dr. Hamilton's Pills are recommended. They act without griping or discomfort of any kind. This combination treatment of Nerville and Dr. Hamilton's Pills will prove a very satisfactory prevention for Grippe, Flu, etc.

Teeth and Health

Issued by The Canadian Dental Hygiene Council and The British-American Dental Society

PYORRHEA

The warning—"that four out of five" in Pyorrhoea's toll—as increased at you daily from newspapers and magazines—should not be taken too lightly. It seems to be substantiated by the report of a dental expert who declares that approximately from seventy-five to ninety per cent of individuals of twenty years of age and over, have acquired Pyorrhoea.

But though the situation is not so alarming as we are asked to believe, yet Pyorrhoea is an all too prevalent disease and one concerning which information should be more widely published.

This disease is one affecting the bony tissue enveloping the teeth and the involved soft tissue structure. It manifests itself by a breaking down of those tissues and structures, accompanied by the progressive loosening of the teeth, and the formation of "pus pockets."

Authorities have established beyond question that this disease is a menace to the health, maintaining as it does, a most favorable condition for the growth and perpetuation of micro-organisms that cause disease.

Much interesting dental research has been carried on with a view to discovering the cause of this disease. Many factors contribute to its inception, such as faulty oral hygiene, and various constitutional disturbances or general ill-health.

It is to be safe to say that in many cases the disease is caused by a sequence from neglect of proper oral hygiene.

One of the dangerous features of this malady is that the initial lesion is a bone resorption which is detected due to the fact that the teeth become loose and may fall out at this time should or no change in color.

Remedial treatment should be prompt. Do not, however, be too easily misled by the urgency of the so-called "Pyorrhoea cure," the claims for which have been made in instances exaggerated, but often totally misleading.

Wonderful Camera Invented

Will Take Pictures Moving At Quickest Known Speed

Three million speed, even-sized snapshots per second taken on a special film, is the astounding claim of one of the most important of the new inventions of the National Geographic Society.

This is the remarkable record of Professor Carl Cranz, one of Germany's most famous experts on ballistics, claims to have established by a new device of electric spark.

Professor Cranz explained to an exclusive interview with International News Service.

Professor Cranz believes that his invention may contribute to the perfection of flying by studying more closely the technique of the flight of small birds and insects, and that it may also prove helpful for the improvement of manufacturing methods in various industries.

"The invention makes it possible to take pictures of any visible object on earth moving at its quickest known speed," said Professor Cranz. "The highest speed ever attained and measured was 1,500 to 2,000 meters per second. It was reached by splinters of the shells fired into Paris by the famous German long range gun during the war, popularly but mistakenly called the 'Big Bertha.' The shells themselves move a little slower. But with the new device one could easily catch mass moving at a speed of 100,000 meters per second. Such a speed has never been attained on earth and will, in all probability, never be reached by men."

The average weight of the contents of a freight car is about forty tons.

BOTHERED WITH ECZEMA 2 YEARS

Itched and Burned, Formed Eruptions, Healed by Cuticura.

"I was troubled with eczema on my hands, limbs and face. It began with an itching and burning and became so bad that I could hardly stand it. It bothered me for two years."

"I tried different ointments but they all failed to help me. I began using Cuticura Soap and Ointment and got relief. I continued the treatment until now I am completely healed."

(Signed) Mrs. Alank McDermott, Tasmagouche, N. B., Sept. 27, 1923.

Clear the pores of impurities by daily use of Cuticura Soap, with touches of Cuticura Ointment as needed to soothe and heal. Cuticura is fragrant and refreshing. Write for booklet, "Eczema and Skin Diseases," and sample of Cuticura Soap and Ointment. 25c.

Recipes For This Week

(By Betty Barclay)

SLICED LEMON PIE

1½ lemons.

2 eggs.

1½ cups sugar.

1½ cup water.

1 tablespoon melted butter.

½ teaspoon salt.

Grate the rind of one lemon. Peel white part from lemons and slice the pulp. Very thin slices of lemon.

Beat eggs until light. Add sugar gradually, then grated rind, water, butter, salt and lemon slices. Bake between two crusts. Put into hot oven (450 degrees). After 10 minutes reduce heat to moderate (350 degrees) and continue baking 30 minutes longer.

SALMON TURNOVERS

Chop the one pan salmon and one hard-boiled egg. Stir half a teaspoon mustard cornstarch in half a cup milk and allow it to stand 10 minutes. Beat in salmon, one tablespoon butter and season. Cook. Make a rich crust, and cut the turnovers with a saucer upside down. Wet edges with cold water. Put a good tablespoon of salmon mixture on half of crust, fold over other half and press well together. Cut small bits on top brush with milk and bake in quick oven.

No need to butter wither crust, or to rub the rim of pasting them. Roll them out and cut them into small pieces. Move them surely and painlessly with Holloway's Corn Remover.

Flames From the Sun

Sometimes Reach Height Of Half a Million Miles

Flames leap outwards from the surface of the sun at the rate of 20,000 miles a minute and sometimes reach a height of half a million miles, says Dr. Ferdinand Keller, astronomer at the Mount Wilson Observatory, California. When these "prominences" were first noted, during a solar eclipse, they were supposed to be divided as to whether they belonged to the sun or the moon. In 1868, Sir J. N. Lockyer, the astronomer, found he could observe them by a spectroscopic method without waiting for an eclipse, and proved that they issued from the sun. It was while studying these tongues of flame that he became convinced of the existence of helium.

Making Signature Valid

Spaniards Have To Add Little Phrase Called a "Rubric"

A gentleman on returning from a business trip to Spain tells of an old habit which he was obliged to adopt. Spanish signatures, he says, are always followed by a little flourish or hieroglyphic. Each person has his own. When the Englishman signed business documents, he was invariably asked to add his "rubric."

The flourish is called. Without it a signature is not considered valid.

Risks Not Great

The chance of being killed through a railway accident on a British railway in 1927 was 36,000,000 to one. One passenger was killed for every 36,000,000 carried.

"May I call on you?"

"I'm sorry, but I'm married."

"Well, I'm married and just as sorry."

Beware of the man whose story sounds too good.

No man yet ever got indignation from allowing his pride!

Minard's Liniment prevents Flu.

Selling Furniture

From Nelson's Ship

Three Pieces From Cabin To Be Disposed Of

Three pieces of furniture which Nelson used in his cabin in the Victory, and which today occupy their former position in the old battleship at Portsmouth, are to be sold by their owner.

The furniture consists of a mahogany dining table (which has folding leaves), additional and wine cooler.

According to the description attached to the sale, the furniture was made by W. Wilkinson, of Longbridge, in 1800.

With Nelson's body, was being brought to England, the Victory put back into Rosita Bay, Gibraltar, and the furniture was put ashore, where it is believed to have been secretly sold by one of Nelson's servants.

In 1802 it was bought by the grandfather of the present owner, who lent it to the Victory in October last.

BABY'S OWN TABLETS WIN GREAT PRAISE

Many Mothers Always Keep Them In The House

Thousands of mothers state that they know of no other medicine for little ones to equal Baby's Own Tablets—that they always keep the Tablets in the home as a preventive of childhood ailments, or if sickness does suddenly grip their little ones they feel safe with such a remedy at hand.

Concerning the use of the Tablets Mrs. Donald Plouffe, Winnipeg, Que., writes:—"I have nothing but praise for Baby's Own Tablets. They are the only medicine I have ever given my two little ones and I am glad to state that the Tablets have always kept them in perfect health. I feel so safe with the Tablets that I always keep a box in the house."

Baby's Own Tablets are a mild but thorough laxative. They regulate the bowels, sweeten the stomach and induce comfortable digestion and indigestion; break up colds and simple fever and make the cutting of teeth painless. The Tablets are absolutely safe, being guaranteed free from all harmful drugs. They are sold by all medicine dealers or by mail at 25 cents a box.

Record Of Juvenile Wonder

Boy Born In 1721 Possessed Most Unnatural Ability

Old records cite the case of one juvenile wonder named Christian Heintzelman, born in 1721, at Dubuque who at the age of ten months could speak and repeat every word said to him. At twelve months he knew French. "Parlez!" In his second year he learned most of the Bible—Old and New Testaments. In his third year he talked history and geography. In his fourth year he mastered French. He was taken to Copenhagen before the king and proclaimed a wonder.

He died June 7, 1728, from a weak constitution.

Many mothers can testify to the virtue of Mother Groom's Worm Expeller, because they know from experience how useful it is.

The average velocity of wind in Philadelphia is 10 miles per hour.

At the first sign of it. Its Healing Qualities are Amazing. THE OLD RELIABLE.

How far would you go to be sure of a better Oil?

Knowing that a better oil means smoother performance, longer life, greater economy and higher trade-in value for your car, you'd probably go a long way to be sure of a better oil.

That's what Imperial Oil Limited did—went all the way to tropical South America for the crude out of which to refine Marvelube.

There's a lot of crude oil available right at Canada's front door. If Canada's largest and most modern refineries had been able to evolve as good an oil as Marvelube from locally available crude they would have been glad to do so. Peruvian crude made a pure, carbon-free, fuller-bodied oil—an oil that meant better lubrication—so Peruvian crude was decided upon.

The decision set a new standard in motor oils. Air-craft operators, the most particular buyers of oil, are enthusiastic about Marvelube because it has given them a longer period of operation between engine overhauls, and a greater margin of safety. You can enjoy the same benefits in your car, and there is a grade of Marvelube that is refined to meet the exact requirements of your car. Consult the Marvelube card at good service stations and dealers everywhere.

TWO TOWN-TEAMS MEET IN SCHEDULE GAME

For the first time this season the two town football teams met in a league fixture here last Wednesday evening, the town team winning out by a goal to 0.

As all the Review reporters were busy that evening on other appointments we cannot give a full account of the play but in the opinion of the spectators I was one of the best of the season. That the teams were very evenly matched is shown by the score. The play was close throughout and a lively pace was kept up from start to finish, showing that Redcliff has two fairly good teams in the league.

MOTHERS' DAY OBSERVED

AT GORDON MEMORIAL

Mother's Day was celebrated in the Gordon Memorial church last Sunday at the morning service. There was a goodly congregation. The order of service prepared by the Religious Education Council of Alberta, was used. Little Miss Fern Stratto spoke evoked the words of welcome to the mothers. Fern Dindahl gave a recitation; Mrs. Thacker read a beautiful story and Francis Buchholz read a short poem of Miss Carman's. The junior choir sang two special mother numbers in their finished manner. At the close of the services bouquets of carnations were given to the Sunday School some of the mothers of the second degree. Altogether it was a beautiful and impressive service.

Farmers from the north country tell us that the new government grade north from the Landis farm to Blinville is now one of the best in this part of the country. Motorists are finding this out and are using the road extensively for pleasure driving.

SOME OTHER PEOPLE

The tale of the Chinese policeman's life seems to indicate that he could stand out a very early "where do you think you're going?" if he thought you would understand him, but passengers on the Canadian Pacific World Cruise last year found him very courteous. Some time before the policeman's life was told in the morning paper head gear they were greeted at the entrance of the famous stadium at Atlanta by the forty-fourth and it was like the Harry Lauder in a cartoon of the worst feature of the policeman's life and the best advertisement national soldier. But the Japanese practice of the policeman's number takes the cake when it comes to strange head gear. A man could be made here about "mushy" and "mushy" but he had seen. The dark representative of the fair one eventually balance in simplicity of one young man too, and one head gear. The policeman's life has probably been amongst the old family accounts handed down from mother to daughter for centuries in her country. Taking them altogether they are a fair sample of strange sights to be viewed on a trip round the world. The Canadian Pacific has organized the winter cruises this year. Round the World by the "Empress of Australia" South America, Africa by the "Empress of Asia" and the "Empress of America" by the "Empress of Scotland" and three cruises to the most happy hunting grounds of the businessman—the West Indies.
